Host Institution – Company-Community Partnerships for Health in Indonesia (CCPHI)

Company-Community Partnerships for Health in Indonesia (CCPHI) is a non-profit organization which promotes partnerships among companies, non-governmental organizations, and local governments for healthy and sustainable communities. CCPHI promotes the message that adequate trust among partners, when combined with access to sustainable funding, governance and accountability are crucial to the success of public-private partnerships in the health sector. CCPHI tools help organizations to form more partnerships for community health and sustainability; for example, by sharing widely the information on how to partner effectively with NGOs across sectors. Health is key to sustainable development.

2015 Goals

- Stabilization of EIM Indonesia National Center Advisory Board and leadership group
- Building a better foundation with the Indonesia Association of Sports Medicine Doctors
- Continuing to develop training workshops for health care providers
- Developing national physical activity guidelines for Indonesia

Past Accomplishments

- Signing of MOU with the ACSM & receiving funding from Coca-Cola Indonesia
- Conducted 3 EIM training for healthcare professionals and one for exercise professionals
- Conducted a survey among doctors who participated in their training course to determine the impact it had on their PA counseling habits with their patients
- Conducted a survey with the public to determine if they were physically active and if they were

receiving PA counseling from their healthcare provider
