## Host Institution – ILSI Focal Point China

ILSI Focal Point China has contributed more than 16 years of rich experience and activities, and made significant contributions to the promotion of cooperation and scientific information exchange between Chinese and global academic communities in the field of nutrition and food safety. All the activities of the ILSI Focal Point in China are well targeted to the major country-specific public health issues and the emerging problems in nutrition and food safety in China. Importantly, follow-up program activities are conducted after the workshops and conferences in collaboration with the relevant organizations and institutions.
