Nutri-Med

Host Institution – Nutri-Med: Centro de Nutrición y Medicina Deportiva

Nutri-Med is a commercial health care company, which was established in 2007 with the mission of offering society a center dedicated to health through the combination of three pillars: nutrition, sports medicine and esthetic medicine. The role of Nutri-Med is to represent, support and promote the goals appointed by EIM in the Dominican general population and health professional's society.

2020 Goals

- Incorporate exercise prescription into the duties of health professionals
 - Promote physical activity in the lifestyle of a health professional
 - Implement physical activity as part of the national health system
 - Provide educational training courses for the national health insurance doctors
 - Develop an EIM app to give the workshop via digital technology
 - Insert courses into local universities on EIM
 - Find sponsorship of additional private companies to support our trainings and activities
 - Expand EIM training course model for all of Central America
 - Participate in the main medical conferences in the Dominican Republic
-

Accomplishments to Date

- Formed partnerships with organizations across the DR (Pan American Health Association, Colegio Medico Dominicano, Instituto Nacional de Diabetes, Sociedad Dominicana de Interna Medicina, and Instituto Nacional de Cancer) to disseminate the message of the benefits of physical activity for the prevention of non-communicable diseases
 - Received sponsorship from MoviSport, Amadita, Revidox, TechnoGym DR, and the CNC Center for Clinical Nutrition
 - Received additional funding from Abbott Pharmaceuticals to conduct an extensive series of health professional training courses across the Caribbean and Central America
 - Certified nearly 1500 health care providers across the Dominican Republic and Central America (Guatemala, Panama, Costa Rica, El Salvador, Honduras)
 - Began integrating EIM into the local health system, in partnership with medical societies and medical specialties, into clinic care, particularly as it relates to patients with noncommunicable diseases. A big part of this effort is through the support of physicians that have already completed the EIM certification course
 - In February 2018, hosted a national health event in the Dominican Republic with the aim of motivating the general public and raising awareness that physical activity is a main tool in the prevention of non-communicable diseases. Assessed the functional fitness, weight, size, hip circumference, strength and flexibility of 1,395 individuals
 - Actively participated in community events, such as the national Wellness Day, where they provide evaluations of the health and/or physical condition of the participants
 - Participated in the Great Fund of New York - Dominican Republic (GFNY) Expo GSSI Marathon of Santo Domingo giving talks and having a presence at the expo measuring the physical fitness of the participants
 - Participated in the annual congress of internal medicine, organizing talks on prevention and physical activity
-

**Exercise
is Medicine®
