Host Institution – University of Limerick

The University of Limerick (UL) is a non-profit organization, established in 1972, that is located in Castletroy, Limerick, Ireland. UL is an independent, internationally-focused university with ~16,000 students and 1,600 staff that is an energetic and enterprising academic institution with a proud record of innovation in education and excellence in research. UL is dedicated to: developing a community of scholars with a global reputation for excellence, creativity, innovation, entrepreneurship and engagement; building on the expertise of these scholars to create, harness and impart knowledge for the benefit of our students and community; and, fostering curiosity, creativity and academic excellence in an inclusive community committed to social good. UL offers programs across a wide range of disciplines, including arts, business, engineering, health and medicine. UL currently supports multiple campus- and community-based exercise programs among healthy and patient groups, the Exercise is Medicine On Campus program and extensive physical activity and exercise research conducted by members of the Health Research Institute, Physical Activity *for* Health Research Cluster, Department of Physical Education and Sport Sciences, and the School of Allied Health.

David Kelly, Ph.D.	<ul style="list-style-type: none"> • Lecturer, Athlone Institute of Technology

2020 Goals

1. Increase the number of physicians and allied health professionals that have received EIM training and are actively engaged in the assessment, prescription and counseling of physical activity in health care systems by increasing EIM training opportunities and embedding EIM into medical and allied health curriculum
2. Following assessment and prescription, increase referral to community-based exercise programs (i.e., NERF high support or medium support centres; <https://www.hse.ie/eng/about/who/healthwellbeing/our-priority-programmes/heal/heal-docs/national-exercise-referral-framework.pdf>) and qualified exercise professionals
3. Establish a national registry of EIM credentialed practitioners for exercise referral to encourage the appropriate use of qualified exercise professionals in the prevention and treatment of chronic disease
4. Increase the exposure of EIM to university and other educational campuses through the expansion of the EIM On Campus initiative, striving to establish the EIM On Campus initiative at all major Irish higher education institutions
5. Increase the number of individuals meeting the guidelines set forth in the Irish National Physical Activity Plan, documented through longitudinal surveillance
6. Establish an annual EIM Ireland National Conference to increase national and regional dissemination of advances in EIM-related research and practice

**Exercise
is Medicine[®]
