## Host Institution – Department of Medicine

### Acting division – Sport and Exercise Medicine Division, University of Padova

The Sport and Exercise Medicine Division of the University of Padova is the office of the Regional Centre with expertise in the therapeutic prescription of exercise in different chronic diseases. After a clinical evaluation, which includes cardiopulmonary exercise testing and strength and balance analysis, the Division provides patients with an adapted and tailored physical exercise prescription. Patients are subsequently referred to the institutional gym to start their activity program. The objective of the Centre is to create a regional clinical and outpatient network for the prescription and application of physical exercise as prevention and treatment modality in different non-communicable diseases.

## 2021 Goals

1. Analyze the current situation of physical activity prescription in primary care
2. Assess primary care physicians' competency in providing exercise prescriptions
3. Engage primary care physicians in a training program on exercise prescription
4. Start an awareness-raising/communication campaign on EIM
5. Promote a general physical activity campaign to increase the number of active people
6. Develop a clinical physical activity prescription network in a couple of regions to pilot the concept in Italy
7. Develop a workshop to educate general practitioners in exercise prescription
8. Implementing "Palestre della Salute" ("Health Gyms") in pilot regions with the aim of forming a network of facilities throughout Italy

**Exercise  
is Medicine®  
Italy**

---

## Accomplishments to Date

- Officially established the EIM Italy National Center in October 2019
- Conducted two trainings for 20 healthcare providers and another two trainings for 25 exercise professionals in 2020 during the coronavirus pandemic
- Translated and produced six handouts (in three languages) about exercise in different chronic diseases (2020)
- Performed a cost savings pilot study in the Veneto Region examining the economic impact of exercise in four chronic diseases (2020)
- Submitted a grant application to ERASMUS+ to develop and evaluate an EIM network in Italy

**Exercise  
is Medicine®  
Italy**
